

MUHAMMAD QASIM ALI

AI/ML Engineering Intern

Lahore, Punjab, Pakistan | +92 328 7392311 | qasimaliarain6@gmail.com

Portfolio: [muhammadqasimaliportfolio.netlify.app](#) | GitHub: [MQasimAliArain](#) | LinkedIn: [muhammad-qasim-ali-606531308](#)

PROFESSIONAL SUMMARY

Computer Science student at UET Lahore (graduating 2027) and AI/ML Engineering Intern with hands-on experience building, tuning and deploying machine learning, deep learning and RAG-based solutions in Python. Completed 10+ projects across AI, web and console applications, and earned a Top Performer Award in Generative AI training. Ready to work onsite in Lahore, take ownership of real engineering tasks and grow into a full-time role.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, Java, SQL

Machine Learning: Supervised & Unsupervised Learning, Regression, Classification, Recommendation Systems, Hyperparameter Tuning, Model Evaluation

Deep Learning & GenAI: Neural Networks, CNNs, Transfer Learning, TensorFlow, Keras, PyTorch, NLP, Retrieval-Augmented Generation (RAG), LLM API Integration

Data Science: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, EDA, Data Preprocessing, Feature Engineering

Tools: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Linux

Foundations: Data Structures & Algorithms, Linear Algebra, Probability, Statistics

EXPERIENCE

AI/ML Engineering Intern – DevelopersHub Corporation (Remote)

Mar 2026 – Apr 2026

- Built and optimized machine learning models in Python and Scikit-learn on real-world datasets, delivering six end-to-end projects.
- Improved model accuracy through data cleaning, preprocessing and feature engineering; guided feature selection with exploratory data analysis (EDA).
- Tuned models with hyperparameter optimization and evaluated them with appropriate metrics to boost performance.
- Collaborated with a team to develop and deploy AI-based solutions and ML pipelines; completed the program with exceptional performance.

Web Development Intern – NextGen Learners

2025

- Developed responsive websites and improved user interfaces using modern web technologies.

PROJECTS

- Context-Aware RAG Chatbot** (Python, Generative AI) – Combined document retrieval with generative AI to give accurate, context-aware answers grounded in source documents.
- Face Attendance System** (Deep Learning, CNN, Transfer Learning) – Built a face recognition system on pre-trained CNN models that automates attendance and reduces manual errors.
- Health Chatbot** (Python, NLP, API Integration) – Developed an AI chatbot that understands and answers health-related queries through API integration.
- Customer Churn Predictor** (Scikit-learn, Classification) – Built a classification model on behavioral data and used feature analysis to identify the key drivers of retention.
- House Price Predictor** (Scikit-learn, Regression) – Built a regression model for price prediction, improving accuracy with feature engineering and preprocessing.
- Movie Recommendation System** (Python, Similarity-Based ML) – Developed a recommendation engine that personalizes suggestions from user behavior and historical data.

EDUCATION

BS in Computer Science – University of Engineering and Technology (UET), Lahore

Sep 2023 – Sep 2027 (Expected)

Focus: Artificial Intelligence, Machine Learning, Data Structures and Algorithms

FSc Pre-Engineering – Aspire Group of Colleges, Multan

Aug 2021 – Apr 2023

CERTIFICATIONS & AWARDS

- AI/ML Engineer Certification – DevelopersHub Corporation (Mar – Apr 2026)
- Generative AI Application Developer – Pak Angels & iCode Guru (Jun – Jul 2025), Top Performer Award

LEADERSHIP

President – UET Tribune, Narowal

Sep 2025 – Jun 2026

- Led a student society: organized events, managed the team and coordinated members.

Campus Ambassador – MT Bytes
